Shadowmatch: New Developments

- By Lizette Bester

Dear user, we are on a continuous drive to enhance the system and to make it even more user friendly and comprehensive. We have a couple of new developments going live during June. These are:

1. **Automated Benchmark reliability and validity checking:** The system has been updated to automatically check the reliability and validity of the benchmark. The benchmark strength will be indicated by either a green, amber or red bar and the system will prompt the user indicating which individual needs to be removed in order to improve the benchmark stability.
2. **Standardisation of reports:** All the reports (short Personal Report and Matching Report) will be standardised to carry the same look and feel. Both the Matching Report and short Personal Report will now be sent as an attachment in pdf format. The e-mail that accompanies the short report will explain that the report is only an abbreviated report highlighting the strongest habits and that a full integrated Feedback Report is available. The Matching Report development will only be completed towards the end of June due to the fact that the Matching Report will also now include the Shadowmatch results page.
3. **Multimove and copy:** We have upgraded the system to allow the user to move or copy more than one Shadowmatch result at a time.

Other developments that you can look forward to, are:

1. The functionality of receiving a confirmation e-mail once an individual has completed a worksheet.
2. The functionality of e-mailing the full integrated Personal Feedback Report directly from the system.

With the continuous enhancements and new developments we strive to make Shadowmatch even more user friendly and empowering.
